**MSD Notice of Completion  
 MARIEMONT SSO ELIMINATION  
 CIP 2001-27, SS #3490  
 In Columbia Township and the Villages of Fairfax and Mariemont  
 Hamilton County, Ohio**

Cincinnati, December 26, 2006 – Under a contract Managed by the Metropolitan Sewer District of Greater Cincinnati (MSD), Sunesis Construction substantially completed the Mariemont SSO Elimination Project. Construction commenced on February 7, 2005 and was substantially completed on September 14, 2006 at a cost of approximately \$7.6 million. Where necessary, additional final restoration will be completed in the Spring of 2007.

This project eliminated three existing highly-active sanitary sewer overflows (SSOs), in compliance with the current requirements of the “Global Consent Decree”.

The project began near the intersection of Wooster Pike and Red Bank Road in the Village of Fairfax and continues along Wooster Pike through Columbia Township to the intersection of Wooster Pike and Oak Street in the Village of Mariemont.

Additional sewer construction work associated with the job took place in Harvard Acres, Park Lane, and Mariemont Ave. east of the Mariemont community pool.

This project is part of MSD’s ongoing Capital Improvement Program (CIP), which is focused on continually updating and improving the operation of MSD’s wastewater collection and treatment systems.

Every day, the Metropolitan Sewer District of Greater Cincinnati (MSD) manages the effective collection and treatment of more than 200 million gallons of wastewater and actively maintains 3,000 miles of sanitary and combined sewers that run through the 49 municipalities and townships of Hamilton County. Owned by Hamilton County and operated by the City of Cincinnati, MSD is committed to continually maintaining and improving its wastewater collection and treatment systems for the betterment of both public and environmental health.
